Theyab bin Tahnoon bin Mohammad presides over the Al Ain University Board of Trustees meeting

Sheikh Theyab bin Tahnoon bin Mohammad Al Nahyan chaired the meeting of the Board of Trustees of Al Ain University for the academic year 2023/2024- at the university's campus in Abu Dhabi, in the presence of the board members. The council discussed various topics related to the educational, academic, and administrative aspects of Al Ain University and approved several decisions aimed at achieving the university's aspirations and goals.

The council also reviewed the latest developments in the university's construction projects, including buildings, facilities, and services provided by the university. Additionally, the council was briefed on the university's significant academic achievements in global rankings and

international accreditations. Al Ain University recently advanced to rank 552 globally, according to the QS World University Rankings 2025, and is among the top 100 universities worldwide according to the Times Higher Education Impact Rankings 2024.

The council also reviewed the latest academic developments, study plans, scientific courses offered by the university, and the programs and specializations available in various colleges. They discussed the strategic policies adopted by Al Ain University to develop and enhance the expertise of academic and administrative staff through scientific research and specialized training courses.

AAU is ranked 552 according to “QS World University Rankings” 2025

جامعة العين

في المرتبة

552

عالمياً

بحسب تصنيف (كيو إس) للجامعات العالمية 2025

Al Ain University (AAU) has been ranked 552 worldwide according to the QS World University Rankings 2025. This reflects the university's outstanding performance in terms of educational development and its prestigious academic reputation in the international academic community, solidifying its position as a leading academic institution. The QS ranking is one of the most renowned global rankings for benchmarking universities, as its methodologies rely on analyzing and measuring the academic attributes of institutions, such as the level of education, quality of scientific research outputs, and the scientific and professional capabilities of graduates.

This progress indicates the notable improvement of the university's achievement in ranking indicators, including academic reputation, employer opinions, faculty-student ratio, international research network, web impact, percentage of staff with doctoral degrees, percentage of international faculty members.
